Dr. Marcello Suarez-Bigetti completed his training as a general surgeon. Specializing in cosmetic phlebology, conducted 25 clinical trials on the Germany developed sclerosant agent Polidocanol. Dr Suarez is recognized as an authority in the sub specialty of phlebology, has pioneered the exploration of new therapies for the treatment and prevention of vein-related disorders. Dr. Suarez has been involved in physician training programs for 16 years including many topics in cosmetic dermatology and dermatological surgery. Dr. Suarez sits on several Scientific Advisory Boards. Dr Suarez has developed original surgical procedures in cosmetic surgery, developed a technique for auto-grafting and autologous adipocyte transplantation, developed a proprietary technique for follow up CO2 laser resurfacing techniques, conducted animal and human clinical trials on wound healing and laser tissue interaction. He has published numerous articles in a variety of Dermatological Surgery Magazines.
